

Price list for fiber optic cable laying in mobile ducts

Overview

Basic: 800 ft of single-mode fiber routing through a paved residential area, minor restoration, no conduit beyond surface mount, standard connectors. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Buying fiber optic installation services involves several cost components, with total price influenced by length, location, and access. The main cost drivers include trenching or aerial deployment, materials, labor hours, and any required permits. This guide presents ranges in USD and practical price estimates to help. Fiber optic cables consist of multiple fibers, each designed for high-speed data transmission. Data aggregated from Q1 2026 contractor invoices across Texas, Ohio, and North Carolina.
