

Price of French Optical Cable Silicon Core Tube

AI Overview

The price of French optical cable silicon core tubes varies depending on size, specifications, and supplier, with direct quotes typically obtained from manufacturers or distributors. Overview French optical cable silicon core tubes, often made from HDPE with a silicone inner layer, are designed for high-performance fiber optic installations. These tubes provide low friction, high pressure resistance, waterproofing, and long service life, making them suitable for outdoor communication networks, highways, and public information systems. Common sizes include 32/26 mm, 34/28 mm, 40/33 mm, 46/38 mm, 50/41 mm, and 63/54 mm. Suppliers in France Several French companies manufacture or distribute optical fiber and silicon core tubes: IDIL Fibres Optiques: Specializes in fiber optic and laser technologies, including optical cables. LUXERI: Offers custom fiber optic lighting solutions and optical cables. Intercom Technologies: Provides high-value project management and optical cable solutions. WAVETEL: Manufactures and distributes testing equipment for telecom networks, including fiber optic infrastructure. Centre Fibre Optique: Focuses on FTTH deployment and optical fiber network services. For international sourcing, DEF PIPELINE supplies HDPE silicon core pipes with specifications suitable for optical cable installation, emphasizing smooth inner walls and long service life. Pricing Considerations The price of silicon core tubes depends on several factors: Tube diameter and wall thickness: Larger or thicker tubes cost more. Material quality: High-density polyethylene with silicone coating increases durability and price. Quantity and order size: Bulk orders often reduce unit cost. Supplier and location: Domestic French suppliers may have different pricing than international distributors. Market conditions: Fiber optic material prices fluctuate based on global demand and raw material cost...
