

# Smelling odor from the distribution box

## Overview

The breaker box is the main distribution point for all electricity entering your home, and any unusual odor suggests that a component inside is overheating. A fishy odor emanating from your electrical panel, often called a breaker box, is not a normal household smell and should be treated as an immediate emergency. This distinct smell, often described as melting plastic, rubber, or sometimes a fishy odor from overheating components, indicates excessive heat. There are a number of strange smells that may emanate from the electrical panel or consumer unit in your home. Bad. If you notice a burnt smell coming from your breaker, something is wrong with your electrical system. This smell warns you that electrical parts may be failing or. Faulty wiring can pose serious risks to your home or business, often making its presence known through a distinct odor.
