

The distribution box failed its self-test after being powered on

Overview

Be sure that the power distribution box has sufficient power provided to it. Long cable runs can result in a voltage drop, which can be solved by using a heavy gauge wire. While doing that, we encountered an issue, on a few stacks, where a switch of those stacks wouldn't have enough space on its flash to perform the activation, or even distribution sometimes, getting one of the following errors : - Failure (NCSW32001: Distribution failed using protocol: HTTPS. When they start tripping, overheating, or making strange noises, it's more than just an inconvenience - it's your home's cry for help. Check wires/DIN terminal clasps to. One of them just failed a self test, and when I retry it, it continues to fail. 8% with battery capacity at 100%. It correctly shows 16 batteries (0 bad) with all Module Status displays as On & OK or OK. Do not touch live parts, turn off the corresponding power switch to avoid the risk of electric shock.
